The compatible row cultivator individually or in combination:

The deep loosener 1456 has a gauge width of up to approx. 2.30 m and is equipped with a stone breakage guard and wear plates.

The 1457 mounting frame is intended for rear mounting and also for cultivators or short disc harrows, and can be used for cultivation in asparagus rows or similar crops. It is hydraulically foldable in accordance with the StVZO (German Road Traffic Licensing Regulations). The cultivator consists of 12 tines each and a twin breakage roller, width according to customer requirements and optionally equipped with roller bearings. The double tines are a reinforced version with interchangeable coulters.

All three machines from the ProfiStar series are ideal in combination for efficient work in the fields.

The ProfiStar series is well-known for its robust and sturdy construction. All our machines are powder-coated and partially galvanised.

*Production-related tolerances are possible in the specified data, weights and dimensions. No legally binding assurances of specific properties can be derived from this information. Errors and omissions excepted.

Made in Germany

Highlights

- ✓ Working dimensions with 2 cultivators folded out 2600 x 3200 x 1400 mm; single use and in combination possible
