

Article number: 1455

Weight*: approx. 1800 kg

Dimensions*: 2800 x 3100 x 3970 mm (b x h x w)

Highlights

- ✓ Working dimensions 3100x6670x 1500 mm
- ✓ Hydraulic gauge adjustment
- ✓ Maximum carrier distance, from 1750 mm to 2000 mm
- ✓ Optimum row adjustment
- ✓ Clean cutting – no soil breakage
- ✓ Stepless adjustment

Art. no.: additional articles

- 1450.01 breakage roller as tube variant
- 1450.02 breakage roller as flat iron variant
- 1454.04 hollow disc unit for outer row (double discs)
- 1454.05 trailer hoe with 5 spring tines
- 1455.01 ridge former

Powerful, efficient and clean:

The ProfiStar Mega from Metasa is the largest model in the ProfiStar series. The unit enables areas to be worked even faster and more intensively.

As with all Profi Star units from Metasa, the deep mandrel, hollow discs and downstream modules form a holistic unit. **The individual work units can be adjusted separately in height.** In the same way, the hydraulic gauge adjustment can be easily adapted to individual row widths. Due to the applied **dimensional scaling, you** require no further measuring equipment. **The special feature:** Profi Star Mega is a combination attachment. Mounding, tillage and weed control in young plants: everything is possible with one device. The solid workmanship including **powder coating and galvanised active parts** make the Profi Star Mega an absolute professional unit. The Profi Star Mega achieves three times the amount of Profi Star Maxi in the same time.

*Production-related tolerances are possible in the specified data, weights and dimensions. No legally binding assurances of specific properties can be derived from this information. Errors and omissions excepted.

 **Made in Germany**

Suitable for the following crops::
