

**Article number: 1076**

Art. no.: additional articles	
1022.01	3.0 mm UV-resistant 200 m roll foliage and tendril tape
1022.02	2.2 mm UV-resistant 1800 m roll foliage and tendril tape
1022.04	Foliage wire for fastening the shoots
1022.04	Rod fix for fastening the foliage wire
1076.01	Tendril chains 4.0 x 30 m bundle, galvanised
1076.02	Tendril end piece, complete bracing on end colum with galvanised turnbuckle
1076.450	Tendril iron flat centre column 450 mm wide galvanised
1076.600	Tendril iron flat centre column 600 mm wide galvanised
1076.750	Tendril iron flat centre column 750 mm wide galvanised
1076.01.450	Tendril angle row start and end 400 mm
1076.01.600	Tendril angle row start and end 650 mm
1076.01.700	Tendril angle row start and end 700 mm

Suitable for the following crops::

Blackberries

Blueberries

Raspberries

**Climbing aids:**

Metasa climbing aids are ideal for blackberries, blueberries and raspberries. **The long open spaces make harvesting and cleaning much easier because there are no vertical borders (chrysanthemum net). This achieves a proven 30% higher harvest yield.** Dismantling after harvesting is considerably easier. All components are of course galvanised. The climbing aids can also be mounted to wooden and concrete posts. We offer all standard mounting brackets. We also supply the matching end pieces for tensioning and matching wires and tapes.

**Made in Germany**

Highlights
✓ 30% higher harvest yield
✓ No vertical border (chrysanthemum net)
✓ Can also be mounted to concrete posts
✓ Can also be mounted to wooden posts
✓ Simplified harvesting and cleaning
✓ Galvanised
